

Next Generation Labels for Cables

www.cableflag.com

TagPro™ is a simple new way to label cables.

How it Works

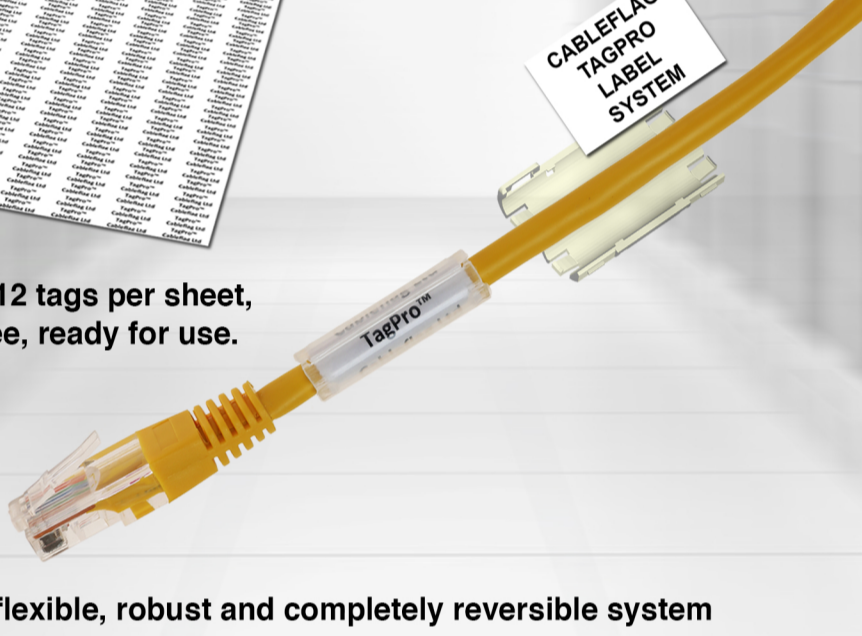

Our free online app works with any browser...
(IOS10 or later)

...making PDFs which run on any system and print using any A4 laser printer...

...creating 112 tags per sheet, adhesive free, ready for use.

A fast, flexible, robust and completely reversible system

Why it is Better

Fast Install
Easy Remove
Free Software

No Adhesive
Rotates & Slides
A4 Laser Printing

The TagPro™ system is faster to install on the cable. It doesn't wrinkle or fade, fall off or leave residue. It is easily removable by hand, it will slide and rotate on the cable. Our software printing solution will work with any browser and the PDFs it creates can be read on any system. Also, you need no special printers, just standard A4 laser & US Letter sizes.

Specifications

TagPro™ Device Physical size:	30mm(W)x8.5mm(T)
Tag Physical Area:	27mm(W)x18mm(T)
Cable Jacket Sizes:	CAT 5 & 6 or 4mm-6mm equivalent
Sheet Material Type:	Enduro Classic Trilaminare Paper
Sheet Dimensions:	A4 International - 297mm(T) x 210mm(W)
Sheet Thickness:	115 ± 15 µm ISO 534
TagPro™ Device Material Type:	Polypropylene Homopolymer Moplen HP548R
ISO Standards:	Automatic Plastics Ltd : ISO9001, ISO13485, BRC-IOP, Grade AA
Available Box Sizes:	200 Units - 3 Tag Sheets (336 Tags) 1,000 Units - 10 Tag Sheets (1,120 Tags)
Box Weights:	200 Unit Box - 0.28Kg 1,000 Unit Box - 0.75Kg
